Student engagement is arguably the most important aspect for a college to ensure student satisfaction

Student engagement is arguably the most important aspect for a college to ensure student satisfaction

Accumulating as much data in this regard gives evidence of what is working and what is not.

There is a positive correlation between student involvement and GPA

Serve as a cost benefit for schools in research and student services

Hypothesis: By creating an incentivized system that unifies the administration, organizations, and students, there can be a centralized database that overlooks retention within student events all while promoting student engagement in a positive fashion.

What We've Done

Developed an API manages all student engagement data

Developed a software that manages the activity with the command line

Begun development on iOS and web interfaces to maximize user reachability

Made an abstract system that allows additions both large and small to be easily implemented.

Future Goals

Implement this system at Chapman University in the near future

Expand to several other campuses in the coming months

Focus on collection, analysis, and sale of student engagement data
